

MOUNTING SUGGESTIONS:

Harley-Davidson® Softail FLSTC 2016 Solo and Passenger Seats

Hardware:	Solo: Small retaining washers x 2 Stock fender nuts (or Mustang part 78032)	Passenger seat: Stock fender screw
Tools needed:	Phillips screwdriver	

These seats will install on the following motorcycles. If your motorcycle is not listed, please contact Mustang for fitment.

- FLSTC Heritage Classic 2016
- FLSTN Deluxe 2016 (without rack)

If you are using the standard rack on the Deluxe, we recommend using the Mustang seats designed for use with the rack.

Removal of stock seat:

1. Remove the rear 1/4"-20 fender screw with a Phillips screwdriver and set it aside. The stock rear fender screw will be used to attach your new Mustang seat.
2. Slide the passenger seat up and back to remove.
3. Remove the two stock screws from behind the solo, and slide the solo seat up and back to remove.

Installation of Mustang seat:

Solo:

1. Remove one of the large retaining washers from the fender studs and replace with the supplied small retaining washer. Repeat for other stud. **Note: Do not remove both retaining washers at the same time!**

2. Insert the solo's nose tab into the frame mount behind the tank.
3. Align the rear chrome brackets onto the fender studs and attach stock slotted nuts (or Mustang part 78032). Tighten securely.

Passenger seat:

1. The two notches at the front of the baseplate engage the slotted nuts mounting the solo seat.
2. Secure the rear bracket with the stock $\frac{1}{4}$ "-20 x $\frac{1}{2}$ " screw.

Enjoy the comfort and custom look of your new Mustang seat!

(Note: FLSTN seats shown. FLSTC is similar without chrome rail.)

These steps are guidelines to help you install your new Mustang product. If you need further assistance, please call us at 800-243-1392 or 413-668-1100, Monday through Friday 9:00 - 5:30 Eastern or send an e-mail to questions@mustangseats.com or visit our website at www.mustangseats.com.
