

DYNA Ignition Coils for Harley - Davidson motorcycles are available in three resistance ranges for different applications.

DC5-1 1.5 ohm (brown) coils are used in pairs, and connected in series, for dual plug applications. For use with electronic ignitions or points with a booster.

DC6-1 3.0 ohm (green) coils are used singly with electronic ignitions or points with a booster.

DC7-1 5.0 ohm (black) coils are used singly with electronic ignitions or points.
